

ABSTRACT

DEVICE FOR FIXING INSTRUMENTS TO AN INSTRUMENT PANEL

5 The device for fixing an instrument, such as a liquid
crystal display screen, to an instrument panel (15)
comprises, according to the invention, flanges (9, 10)
formed on the casing (6) of the instrument, these
flanges being fixed to the bottom of a recess (16) in
10 the instrument panel using captive screws (12) fixed to
these flanges and nuts (19) fixed to the bottom of the
recess.
